NETAL GUPTA

9420809527 | netal.gupta@somaiya.edu | github.com/netalgupta | linkedin.com/in/netalgupta
B.Tech CSBS @ KJ Somaiya | CGPA: **9.05**

EDUCATION

KJ Somaiya School of Engineering Aug 2024 – 2028
B.Tech Computer Science and Business Systems, Mumbai **Sem 4: 10 pointer**

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Python, Java, C, SQL, Flutter, Dart
Web Development: React.js, Next.js, Node.js, RESTful API Integration, Responsive UI Implementation, Git/GitHub
AI / ML: Gemini API, LLM Integration, Prompt Engineering, Web Speech API, Face Recognition, Firebase; Learning: NumPy, Pandas, Scikit-learn, FastAPI, LangChain, Flutter (Dart)
Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Automata Theory, OOP, Software Engineering, COA, ML- upcoming
Design & Creative: Figma, Canva, Adobe Photoshop, DaVinci Resolve – visual branding, content creation, social media strategy

EXPERIENCE

Inhouse – Machine Learning Intern July 2026 – Present
- Working on a realistic virtual try-on experience; building ML models for garment-to-body mapping and image synthesis to enable accurate, real-time virtual apparel fitting

KJSSE ACM Student Chapter – Creative Head July 2026 – Present
- Designed and delivered merchandise for the entire council, establishing a unified visual identity across print and apparel
- Led and mentored the second-year cohort within the council, overseeing creative output and execution quality
- Produced short-form Instagram reels driving 6K–7K+ views per post; maintained full story-content consistency to sustain audience engagement

SWDC – Software Development Intern June 2026 – July 2026
- Developing cross-platform mobile applications with Flutter/Dart; collaborating on full-stack feature development, evaluating emerging frameworks to enhance performance and user experience

Fostride – Social Media & Marketing Intern Aug – Sept 2025
- Provided strategic creative direction and executed trend-driven short-form content achieving 2K–4.5K+ views per reel; maintained consistent brand identity through data-informed content strategy

KJSSE ACM Student Chapter – PR Team Member 2024 – 2025
- Led visual and written communications for campus outreach; directed event branding, creative collateral, and cross-team coordination for technical events

PROJECTS

VARUNA: Ocean & Marine Biodiversity Data Platform | GitHub Smart India Hackathon - Aug 2026
Next.js 14, Deck.gl, Mapbox GL/MapLibre, FastAPI, PostgreSQL/PostGIS
- Built a WebGL Deck.gl ocean map rendering 3,800+ ARGO float positions with a depth-filtering scrubber, as Geospatial Systems & Visualization Lead, to make raw INCOIS ocean-sensor data explorable in real time
- Replaced mock data with live CMLRE master CSV ingestion across the overview map and biodiversity page, and shipped a species search with deep-profile simulation, so users could query real marine survey records instead of placeholders
- Generalized the biodiversity analytics dataset schema for scalable cross-species reporting, and built the proactive anomaly/early-warning alert center surfacing marine heatwave and hypoxia alerts

SaathiCare: AI-Powered Alzheimer's Companion Platform | App Link | GitHub Feb 2026
Next.js, TypeScript, Gemini API, SQLite, JWT, Web Speech API
- Built an LLM-based cognitive care system with multilingual context grounding; engineered prompt pipelines for memory-aware AI conversation and real-time emergency system with live GPS, QR-based patient ID, and auto caregiver alerts.
- Memory Room with Interactive Visuals and Brain-Training Games to Enhance Cognitive Skills.
- Designed tri-role system architecture (Patient – Caretaker – Guardian) achieving ∼4–5s response latency through prompt optimisation and efficient API call handling on constrained deployment.
- Conducted iterative user testing and prompt evaluation, analysing failure cases to refine conversation quality, response consistency, and user experience.

HACKATHONS & COMPETITIONS

- **Smart India Hackathon** – Ranked 2nd of 90 teams selected in college internal round; VARUNA, national-level ocean data platform
- **AfterMath Hackathon** – Top 12 Finalist (36/250+ teams); SaathiCare with LLM context grounding
- **Nexathon** – Top 6; HackTrack with facial recognition and geo-fencing
- **GDG Hackathon** – Top 6; AI-powered competitive programming tracker with LLM-based code evaluation

CERTIFICATIONS

- **Gemini Certified Student** – Google for Education, Issued May 2026, Valid till May 2029
- **Walmart Global Tech Advanced Software Engineering** – Forage; Python ETL pipelines, data structures, UML/ERD
- **Deloitte Technology Job Simulation** – Forage; Telemetry data, system design, software proposals
