B.Tech CSBS @ KJ Somaiya | CGPA: **9.05**

EDUCATION

KJ Somaiya School of Engineering Aug 2024 – 2028
B.Tech Computer Science and Business Systems, Mumbai **Sem 4: 10 pointer**

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Python, Java, C, SQL, Flutter, Dart
Web Development: React.js, Next.js, Node.js, RESTful API Integration, Responsive UI Implementation, Git/GitHub
AI / ML: Gemini API, LLM Integration, Prompt Engineering, Web Speech API, Face Recognition, Firebase; Learning: NumPy, Pandas, Scikit-learn, FastAPI, LangChain, Flutter (Dart)
Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Automata Theory, OOP, Software Engineering, COA, ML- upcoming
Design & Creative: Figma, Canva, Adobe Photoshop, DaVinci Resolve – visual branding, content creation, social media strategy

EXPERIENCE

Inhouse – Machine Learning Intern July 2026 – Present
- Working on a realistic virtual try-on experience; building ML models for garment-to-body mapping and image synthesis to enable accurate, real-time virtual apparel fitting

KJSSE ACM Student Chapter – Creative Head July 2026 – Present
- Designed and delivered merchandise for the entire council, establishing a unified visual identity across print and apparel
- Led and mentored the second-year cohort within the council, overseeing creative output and execution quality
- Produced short-form Instagram reels driving 6K–7K+ views per post; maintained full story-content consistency to sustain audience engagement

SWDC – Software Development Intern June 2026 – July 2026
- Developing cross-platform mobile applications with Flutter/Dart; collaborating on full-stack feature development, evaluating emerging frameworks to enhance performance and user experience

Fostride – Social Media & Marketing Intern Aug – Sept 2025
- Provided strategic creative direction and executed trend-driven short-form content achieving 2K–4.5K+ views per reel; maintained consistent brand identity through data-informed content strategy

KJSSE ACM Student Chapter – PR Team Member 2024 – 2025
- Led visual and written communications for campus outreach; directed event branding, creative collateral, and cross-team coordination for technical events

PROJECTS

VARUNA: Ocean & Marine Biodiversity Data Platform | GitHub Smart India Hackathon – Aug 2026
Next.js 14, TypeScript, Deck.gl v9, Mapbox GL/MapLibre, React, FastAPI, PostgreSQL/PostGIS, WebSocket
- Built a **WebGL Deck.gl geospatial canvas** rendering **3,800+ live ARGO float nodes** at 60 FPS with a 0–2000m depth-filtering scrubber, as Geospatial Systems & Visualization Lead
- Replaced mock data with **live CMLRE master CSV ingestion** via a PostGIS-backed Darwin Core pipeline; shipped a species search querying **5,385 real marine records across 2,521 species**
- Architected a **taxonomic color-scale biodiversity layer** and real-time **Marine Heatwave alert center** (Hobday 2016 Category I–IV + hypoxia) surfacing alerts via WebSocket push
- Wired **AnomalyAlerts.tsx** to `/api/v1/anomalies` with 5-minute auto-polling, severity-tiered alert cards, species impact badges, and one-click fisheries advisory export

SaathiCare: AI-Powered Alzheimer's Companion Platform | App Link | GitHub Feb 2026
Next.js, TypeScript, React Three Fiber, Gemini 1.5 Flash, SQLite, JWT, Web Speech API
- Built a **tri-role platform** (Patient / Guardian / Caretaker) with **JWT stateless auth** and stage-adaptive UI, serving dementia patients across early-to-severe cognitive stages from a single Next.js codebase
- Engineered a **context-aware AI companion** injecting a live **People Wallet** (family tree + micro-memories from SQLite) into every Gemini 1.5 Flash call, grounding patients in reality with relationship-specific responses
- Designed a **3D voice-first avatar** using React Three Fiber and Web Speech API with bi-directional sentiment detection, dynamic GLB animation blending, and multilingual TTS routing (`hi-IN`/`mr-IN`)
- Shipped a **QR-based Good Samaritan protocol** – strangers scanning a patient's QR get a RAG-powered medical triage AI and GPS dispatch to the guardian, with zero guardian contact required during stabilization

HACKATHONS & COMPETITIONS

- **Smart India Hackathon** – Ranked 2nd of 90 teams selected in college internal round; VARUNA, national-level ocean data platform
- **AfterMath Hackathon** – Top 12 Finalist (36/250+ teams); SaathiCare with LLM context grounding
- **Nexathon** – Top 6; HackTrack with facial recognition and geo-fencing
- **GDG Hackathon** – Top 6; AI-powered competitive programming tracker with LLM-based code evaluation

CERTIFICATIONS

- **Gemini Certified Student** – Google for Education, Issued May 2026, Valid till May 2029
- **Walmart Global Tech Advanced Software Engineering** – Forage; Python ETL pipelines, data structures, UML/ERD
- **Deloitte Technology Job Simulation** – Forage; Telemetry data, system design, software proposals
